

ManyLaws

Making EU legal data easily accessible

for public administrations, businesses and citizens

The internet is loaded with information about legislation, bills, case law, resolutions and decisions, published in each EU Member States' language. In fact, there is so much information available that it is becoming difficult to access. **ManyLaws** is an advanced retrieval and search portal for legal data. It aims to make legal information available to everybody, in a customisable, structured and easy-to-handle way.

EXPLORE OUR BROCHURE

- Benefits for key stakeholders
- The platform's multi-service ICT architecture
- ManyLaws' unified metadata schema

HOW CAN I USE THE MANYLAWS PLATFORM?

- Easily access national and European legal information in English and national languages.
- Compare and visualise connections and correlations between laws from one or more Member States.
- Assess the degree and status of transpositions of EU Directives into national law.
- Access a visual timeline for all relevant legal texts.
- And much more!

MANYLAWS IS ALREADY MAKING AN IMPACT

- Participation in high-level conferences
- Organising interactive workshops
- Publishing papers in acclaimed journals
